

# Program Highlights

## Play-Based

We know from brain research that children learn best through play. Play gives children the chance to make sense of the world around them through curiosity, exploration and discovery.

Our program offers engaging play invitations based on the child's needs and interests, including process art, sensory activities, and other self-directed provocations.

## Schedule

We are a half-day program, loosely following the WCPSS calendar for holidays and most teacher workdays.

## Diversity

We celebrate diversity within our program, welcoming families to share their traditions and holiday celebrations with the children.

## Outdoor Time

We love the outdoors and value the importance nature plays in a child's overall health and wellness. Our teachers can utilize as much time outdoors as they wish! Our thoughtfully planned outdoor learning environment encourages children to move their bodies, explore, discover, and connect to the natural world!

## Behavior Guidance

We know behavior is communication. Building strong connections and trusting relationships with children is the foundation for helping them navigate boundaries and natural consequences.

## Community

Our location provides an ideal opportunity to visit and connect with other local resources throughout downtown Holly Springs. We envision walking field trips to nearby areas of interest.
